STATEMENT OF QUALIFICATIONS

CDIS was formed in 1993 as a premier company that began with the development of desktop and Web-based software solutions for small to medium-sized businesses which allow those businesses to reflect the professionalism of larger companies. CDIS has evolved into a full service firm providing software development and maintenance services expanding its client base to the commercial and government sector.

MISSION STATEMENT

"To provide premium service giving you, our client, the power to accomplish more, in less time, at considerable cost savings."

SERVICES

CDIS services individuals, small businesses, non-profit organizations, large businesses and government clients with a variety of services. Our solutions include:

Software Solutions & Database Development

CDIS specializes in assisting our clients with working more efficiently. When clients can manage business information efficiently, they are given the freedom focus on data analysis and marketing efforts for continual business growth.

Network Solutions

LAN/WAN/SNA Solutions

CDIS consultancy base includes individuals experienced with the development and implementation of client LAN/WAN. This experience base available can assist with Ethernet, token ring, TCP/IP, X.25, ISDN, SNA/VTAM, and other network topologies, protocols and connectivity options.

Network Troubleshooting

CDIS will assist a client's staff in identifying connectivity, security or performance issues that impact today's networks. We help our client base implement the best solutions for performance, reliability, scalability and growth goals.

Helpdesk And User Support

CDIS' team offers a mix of technical skills and customer service skills. CDIS' support systems range from mainframe applications and products to personal computer and networking including LAN, WAN and SNA.

Web Solutions

CDIS provides complete Web solutions for our clientele. The importance for the client to manage their own Web content is the goal in developing Web solutions.

Web Site Services:

- Web Hosting with Domain Name Registration
- Integration of Content Management Systems
- Web site development
- Web site re-design
- Web site maintenance
- Internet Promotions
- Web banner development
- Search Engine Submission

Graphics Design Services:

- Quality graphics design
- Logo development
- Corporate branding

Project Management

CDIS' experienced Project Management team provides clients with detailed plans and courses of action for project goals. All project levels are kept informed from project launch to completion with conscientious conformance to client status reporting requirements.

Corporate Training Solutions

CDIS provides training in areas of database software, SQL programming, and customized software solutions. Whether a client's needs are video training, Web-based video training, in-house training on office suite software, database software, or programming languages, CDIS can offer a solution.

PRODUCTS

CDIS designs software, Web and database products keeping 'ease' in mind for client learning and use. Our goal is to make the day-to-day business data management tasks easier for our clients so that they can concentrate on growing their business and staying on target with their client goals.

STAFF SUMMARY

Dawn R. Sanders – President

Ms. Sanders has collaborated with various departments (Contracts, Engineering, Project Management) for the re-design and maintenance of several government (U.S. Department of the Navy and U.S. Department of the Air Force) Web sites for the purposes of facilitating secured financial reporting and viewing of monthly technical reports for over thirty multimillion-dollar remedial construction projects across geographically diverse project teams. Her experience includes from-the-ground-up development and integration of third-party database tools (Microsoft SQL Server and Microsoft Access) to support project status, e-commerce, and subscription-based web sites. Ms. Sanders is experienced with the use of Unified Modeling Language (UML) database modeling for streamlining design methods in the development of web-based and non-web-based software applications. Ms. Sanders is experienced with the selection and integration of common gateway interface (CGI) scripts, JavaScript, VBScript to enhance web site visitor experience (e.g., event calendars, user registration functionality, and e-mail marketing). Ms. Sanders has developed training documents for, and conducted training in, the use and administration of database systems, HTML editing, Web marketing, Web publishing techniques, and e-commerce database functionality. Ms. Sanders has been presented various awards including an Outstanding Performance Award for successfully designing and implementing a Web-Based Financial Tracking System for US Navy Remediation Projects; a Quality Award for successfully providing Air Force Data Management Services and Geographical Information System (GIS) Design Support; and she was presented a Technical Recognition Award for writing and presenting a Technical Paper.

Education

1988 B.S. Mechanical Engineering
Arizona State University, Tempe, Arizona

Publications

The Development and Implementation of a Database Management System for Remedial Activities at Remote Locations, Presented at the Pacific Environmental Restoration Conference, Honolulu, Hawaii, April 2000.

Jimmy Balawitan, Jr. – Network Specialist

Mr. Balawitan, Jr. possesses the following certifications:

CISCO SYSTEMS, Certificate of Completion for Global Product Services Core Qualification

A+ certification

Equant Certificate of Achievement for MasterCard Systems Training Course

WatchGuard Authorize reseller and installer

Sonicwall Authorize reseller and installer

Netscreen Authorize reseller and installer

Mr. Balawitan, Jr.'s experience includes:

Networked CISCO Routers and Catalyst Switches

Experience in VLANS, access list, ISDN, ATM, frame relay, etc

Installed, configured and maintained various operating systems such as Microsoft NT Server 4.0, Workstation 4.0, Windows 3.X, Windows 9.X, Novell NetWare and Dos either in a stand alone environment or over the network, as a new install or upgrading the operating system

Networked IBM compatible computers with Operating System such as Novel, Microsoft XP Professional, Microsoft Small Business Server, Microsoft Windows 2000 Professional, Microsoft Windows 2000 server, Windows 9x and Linux.

Installed and configured TCP/IP including sub netting, DHCP, WINS and DNS service.

Installed and configured the Remote Access Services (RAS) for dial networking

Designed and implemented TCP/IP networks with multiple subnets

Built custom build workstations with Intel Celeron and Pentium IV processors. Designed and built custom-made servers using Intel processors.

Troubleshoot and repair any brand of workstations and servers such as Dell, Gateway, Compaq, HP, IBM, and e-machines.

Claude Ascuncion – Software Developer

Mr. Ascuncion is proficient in the development, troubleshoot, and maintenance of software systems including those developed in Visual Basic and C++/#. Mr. Ascuncion is also responsible for custom building workstations and offering software integration and upgrade support.

Education

B.S. Degree in Information & Computer Science

University of Hawaii, Manoa
